CHAPTER 1: ABSORPTION CORRELATION SPECTROMETRY

M.M. Millán

1. INTRODUCTION	1
1.1. RADIATION UNITS	2
2. SPECTROSCOPIC ANALYSIS	2
2.1. SPECTROSCOPIC SYSTEMS	2
2.2. THE ENTRANCE SLIT	4
2.3. CROSS-CORRELATION FUNCTIONS I: THE EXIT SLIT	5
2.4. LAWS OF ABSORPTION	6
2.5. ANALYTICAL METHODS	6
2.6. SIGNAL-TO-NOISE RATIOS	7
3. NATURAL BACKGROUNDS	8
3.1. RADIATION TRANSFER IN THE UPPER ATMOSPHERE	8
3.2. RADIANCES FROM THE ZENITH SKY	9
4. SPECTROSCOPIC REMOTE SENSING: THE BASIC PROBLEM	12
5. MASK SPECTROMETRY	14
5.1. CROSS-CORRELATION FUNCTIONS II: IN MATHEMATICS	14
5.2. CROSS-CORRELATION FUNCTIONS III: IN SPECTROMETRY	14
5.3. PEAK AND TROUGH SLITS	17
5.4. EXAMPLES	19
5.5. REVIEW AND DISCUSSION	19
6. DIFFERENCE CORRELATION FUNCTIONS	21
6.1. INITIAL CONCEPTS	21
6.2. SLIT WIDTH SOLUTIONS: I	22
6.3. REVIEW OF SOLUTIONS AND DISCUSSION	24
7. THE CORRELATION SPECTROMETER (COSPEC) REMOTE SENSOR	26
7.1. HISTORICAL DEVELOPMENT	26
7.2. THE COSPEC: OPTICAL LAYOUT	29
8. ELECTRONIC PROCESSING	29
8.1. PHOTO-MULTIPLIER (PMT) OPERATION	31
8.2. PRE-AMPLIFIER AND PRIMARY AUTOMATIC GAIN CONTROL (AGC)	33
8.3. THE AGC CONTROLLING VOLTAGE	35
8.4. THE SECONDARY AUTOMATIC GAIN CONTROL	37
8.5. PRODUCT DETECTOR AND MAIN COSPEC OUTPUT	37
8.6. THE SUPPLEMENTARY SIGNAL PROCESSOR	42
9. NATURAL BACKGROUND EFFECTS	43
9.1. FOREWORD	43
9.2. GENERALISED RESPONSE FOR A TWO-MASK SYSTEM	44
9.3. BASELINE, OR NO-GAS SIGNAL, VARIATION	45
9.4. TARGET-GAS EFFECTS	46
9.5. THE FOUR MASK SYSTEM: THE COSPEC	48
10. THE COSPEC MASKS	49

10.1.	THE SIGNAL-TO-NOISE RATIO EQUATIONS	49
10.2.	INITIAL SOLUTIONS	51
10.3.	ANALYTICAL SOLUTIONS FOR SIMPLE BAND MODELS	52
10.4.	THE NUMBER OF SLITS FOR THE SO ₂ MASKS	54
10.5.	SUMMARY	58
REFERENCES		60
CHAPTER 2: USING THE COSPEC IN THE FIELD		
<i>G. Williams-Jones, J. Stix and P.A. Nadeau</i>		
1.	INTRODUCTION	63
2.	METEOROLOGICAL CONDITIONS	63
2.1.	WIND	63
2.2.	CLOUDS AND CONDENSED WATER VAPOUR	70
2.3.	ONLINE WIND AND METEOROLOGICAL INFORMATION	70
2.4.	SUN ANGLE AND PLUME DYNAMICS	71
3.	USING THE COSPEC	72
3.1.	ASSESSING ACCESS TO THE VOLCANO	73
3.2.	MONITORING STRATEGY - HOW OFTEN TO MAKE MEASUREMENTS?	73
3.3.	OPTIMISING THE DISTANCE FOR MEASUREMENTS	73
3.4.	CONCENTRATIONS AND CALIBRATIONS	74
3.5.	MOBILE GROUND-BASED MEASUREMENTS BY VEHICLE	75
3.6.	MOBILE GROUND-BASED MEASUREMENTS BY BOAT	77
3.7.	MOBILE GROUND-BASED MEASUREMENTS BY FOOT.	79
3.8.	MOBILE MEASUREMENTS BY FIXED WING AIRCRAFT	80
3.9.	MOBILE MEASUREMENTS BY HELICOPTER	83
3.10.	GROUND-BASED STATIONARY MEASUREMENTS	89
4.	RECORDING THE DATA	100
4.1.	CHART RECORDER	100
4.2.	COMPUTER AND ANALOGUE/DIGITAL CONVERTER (ADC)	103
4.3.	DATALOGGERS	105
5.	TROUBLESHOOTING	105
5.1.	TUNING THE MICROMETER	106
5.2.	CHANGING THE PRINTED CIRCUIT BOARDS	106
5.3.	ELECTRICAL PROBLEMS/POWER SOURCES	107
6.	REDUCING THE DATA	108
6.1.	CHART RECORDER	109
6.2.	DIGITAL DATA	111
6.3.	THE USE OF SPREADSHEETS IN DATA REDUCTION	111
6.4.	UNCERTAINTY CALCULATIONS	112
7.	PRESENTING THE DATA	114
REFERENCES		118

CHAPTER 3: APPLYING THE COSPEC AT ACTIVE VOLCANOES

J. Stix, G. Williams-Jones and C. Hickson

1. INTRODUCTION	121
2. THE BEHAVIOR OF SULPHUR IN MAGMATIC, HYDROTHERMAL, AND ATMOSPHERIC ENVIRONMENTS	121
2.1. MAGMATIC SULPHUR: SOLUBILITY, REDOX STATE, AND CONCENTRATIONS	122
2.2. THE ROLE OF HYDROTHERMAL SYSTEMS	124
2.3. SO ₂ - SO ₄ CONVERSION IN GAS PLUMES	126
3. ESTIMATES OF SULPHUR EMISSIONS FROM VOLCANOES TO THE ATMOSPHERE	128
4. CASE STUDIES OF COSPEC MEASUREMENTS AT VOLCANOES	130
4.1. KILAUEA (HAWAII, USA)	131
4.2. MT. ETNA (ITALY)	133
4.3. MASAYA (NICARAGUA)	136
4.4. ARENAL (COSTA RICA)	137
4.5. MT. EREBUS (ANTARCTICA)	138
4.6. MT. ST. HELENS (WASHINGTON, USA)	139
4.7. MT. PINATUBO (PHILIPPINES)	140
4.8. GALERAS (COLOMBIA)	142
4.9. REDOUBT (ALASKA, USA)	144
4.10. SUMMARY COMMENTS	145
5. INTEGRATING COSPEC MEASUREMENTS WITH OTHER GAS DATA	149
5.1. INFRARED REMOTE SENSING OF GASES	149
5.2. GAS GEOCHEMISTRY	150
5.3. ASH LEACHATES	152
5.4. PETROLOGY AND GEOCHEMISTRY OF MELT INCLUSIONS	156
6. CONCLUDING REMARKS	158
REFERENCES	159

CHAPTER 4: NAVIGATION ASPECTS OF AIRBORNE COSPEC DETERMINATIONS OF VOLCANIC SULPHUR DIOXIDE FLUX

S. J. Schaefer

1. INTRODUCTION	169
2. DATA SOURCES FOR AIR NAVIGATION RELEVANT TO COSPEC DETERMINATIONS	172
3. GLOBAL POSITIONING SYSTEM RECEIVERS	173
4. PILOT/SCIENTIST COMMUNICATION	174
4.1. TERMINOLOGY	174
4.2. MAGNETIC AND TRUE NORTH	174
4.3. ADDITIONAL CONSIDERATIONS	175
5. ESTABLISHING FIXES AND WAYPOINTS	176
6. SETTING UP TRAVERSES	176
6.1. FIXED-HEADING METHOD	177
6.2. FIXED-POINT METHOD	180
7. WIND VECTOR DETERMINATIONS	182

7.1.	WIND DETERMINATION WHILE FLYING A TRAVERSE	183
7.2.	WIND SPEED DETERMINATIONS FLYING PARALLEL THE WIND VECTOR	184
8.	EXAMPLES	185
8.1.	POPOCATÉPETL VOLCANO, MEXICO, 1996	185
8.2.	RABAU CALDERA, PAPUA NEW GUINEA, 1994	185
9.	SCENARIO FOR COST EFFECTIVE AND ACURATE COSPEC MISSION	186
10.	CONCLUSIONS	187
	APPENDIX	189
	REFERENCES	190

CHAPTER 5: LARGE VOLCANIC-SO₂ FLUXES: COSPEC MEASUREMENTS AT POPOCATÉPETL VOLCANO (MEXICO)

H. Delgado Granados

1.	INTRODUCTION	191
2.	METHODOLOGY: MEASURING LARGE SO₂ PLUMES	192
3.	SETUP	192
4.	PLANNING	192
5.	DURING MEASUREMENTS	194
6.	DATA REDUCTION	196
7.	AERIAL MEASUREMENTS	196
8.	GROUND BASED MEASUREMENTS	198
9.	POPOCATÉPETL VOLCANO: PAST AND CURRENT ERUPTIVE ACTIVITY	201
10.	CONTRASTING NATURE OF ERUPTIVE HISTORY	201
11.	RECENT ACTIVITY	201
12.	SO₂ FLUXES AT POPOCATÉPETL VOLCANO	203
13.	COSPEC MEASUREMENTS	203
14.	INTERPRETATION OF SO₂ DATA	208
15.	DISPERSION OF SO ₂ PLUMES	208
16.	LOSS OF SO ₂ IN VOLCANIC PLUMES	210
17.	VOLCANIC ACTIVITY AND SO ₂ FLUXES	211
18.	CONCLUSIONS	213
	REFERENCES	215

CHAPTER 6: BEYOND COSPEC: RECENT ADVANCES IN SO₂ MONITORING TECHNOLOGY

P. A. Nadeau and G. Williams-Jones

1.	INTRODUCTION	219
2.	INSTRUMENTATION	220
2.1.	'MINI-DOAS'-TYPE SYSTEMS	220
2.2.	FLYSPEC	221
3.	FIELD METHODOLOGY	222
3.1.	VEHICLE TRAVERSES	222

3.2.	WALKING TRAVERSES	222
3.3.	AUTOMATED SCANNING	223
3.4.	SPECTROMETER NETWORKS	224
3.5.	ALTERNATIVE NETWORK CONFIGURATIONS	225
3.6.	2D PLUME IMAGING	227
4.	ADDITIONAL REMOTE GAS SENSING TECHNIQUES	227
5.	AEROSOLS	228
6.	BEYOND SO₂	228
7.	CONCLUSION	229
	REFERENCES	230
